

Razorpay Registration Guide

This document provides a clear and structured guide for registering on Razorpay in order to enable online payments for an e-commerce website or application.

Step 1: Create Razorpay Account

Sign up on the Razorpay platform using a valid business email ID and mobile number. Verify both using OTP to activate the account.

Step 2: Select Business Type

Choose the appropriate business type such as Individual/Proprietor, Partnership, Private Limited, or LLP. This selection impacts verification and settlement approval.

Step 3: Enter Business Details

Provide business or brand name, website URL, business category, registered address, and expected transaction volume.

Step 4: Add Bank Account Details

Enter bank account information including account holder name, bank name, account number, and IFSC code. Ensure details match the registered business or PAN name.

Step 5: Complete KYC Verification

Upload required documents such as PAN card, address proof, and cancelled cheque or bank proof. GST certificate may be required if applicable.

Step 6: Enable Live Mode

After successful verification, Razorpay enables live mode, allowing real customer payments to be accepted.

Step 7: Access API Keys

API keys can be accessed from the Razorpay dashboard under Settings → API Keys. These keys are required for payment gateway integration.
